

Looking for an IT firm you can really trust?

You just found one ...

eNetSystems, Inc.
your total technology solutions provider

Sure we know operating systems, but we also know operating values.

There are many IT firms to choose from today, and the list of services provided might begin to look the same after a while. That's why we want to explain not only what we do, but especially how we do it.

- We pledge reliability, dependability and expert service
- We practice big picture thinking
- We operate with integrity and do it right the first time
- We focus on long term relationships not short term sales
- We provide value above and beyond technology services

We're a total technology solutions provider.

- Does your IT firm employ a comprehensive approach to services related to your network?
- Is your IT firm an advocate for your business?
- Does your IT firm proactively recommend new technologies that will help your business?

We do .. we are ... and yes we certainly do. If you are looking for an IT provider who will become as invested in your firm's success as you are, switch to eNet Systems. We take a long-term approach to developing business relationships. We get to know our clients; we treat them like family and help their businesses grow.

Put us to the test. We're ready.

Invite us in for a network assessment. We'll listen to goals, evaluate your network, and offer recommendations.

Call us today at 281-403-9561.

"We started working with eNet Systems because we were not satisfied with our current IT provider. Before long, eNet got us into preventative maintenance mode, which saves our firm money. They have also helped us by coordinating services and projects and even negotiating rates with other vendors. From our perspective, one of their best attributes is a sense of urgency. If we cannot reach them instantly, we know they will always call right back. I certainly hope Ash doesn't move his firm away from Houston because we'd have to move wherever eNet Systems goes!"

Brad Neuliep, Owner | Greyhound Combustion

"eNet Systems has handled our network for so many years, it's as if they are our own IT department. If we call in an emergency, we know they will fix the problem promptly. Ash is responsive, intelligent, persistent and goes beyond follow through. He routinely customizes his offering to meet our needs. What really helps is that Ash gives me the tools I need to handle minor issues so I can get back to my business faster. He has even logged on to our system to fix a problem while he was on vacation. Most IT firms will not even answer their phone while on vacation."

Larry Andrew, Owner | iTBG Corporation

"Ash is the most responsive technician I have ever worked with. He is knowledgeable and dependable as well. Often, when I call with a problem, he'll call back within 10 minutes. Ash is a consultant, advisor and technician all rolled into one. I have often called Ash in to explain what new things I need to be able to do. He will research the ideas, create a recommended plan, explain all the options, price the project, and handle the implementation as well. For instance, we are moving towards becoming a paperless office, and Ash of eNet Systems is a big part of this process."

Mike Magana | A Farmer's insurance agency
